SUMMARY

Passionate Data Analyst with a background in Polymer Engineering Technology. Skilled in Excel, SQL, Tableau, and Python for data cleaning, analysis, and visualization. Experienced in building dashboards, tracking KPIs, and transforming complex datasets into clear, actionable insights that support business decision-making.

SKILLS

Technical Skills

- **Excel:** Advanced formulas, PivotTables, Power Query, Dashboard creation.
- **SQL (PostgreSQL):** Data extraction, joins, aggregations, query optimization.
- **Tableau:** Interactive dashboards, KPI monitoring, data visualization.
- **Python:** Pandas, NumPy, Matplotlib, Seaborn for data cleaning and exploratory analysis.
- **Data Analysis:** Data cleaning, exploratory data analysis, trend identification, reporting.

Soft Skills

- Strong communication and data storytelling.
- Stakeholder collaboration and leadership experience.
- Attention to detail and accuracy.
- Adaptability in dynamic environments.
- Analytical and Critical thinking for problem-solving.

EXPERIENCE

Data Analyst – Projects-Based Remote

2025 – Present

- Built interactive Tableau dashboards to track sales, profit, and customer KPIs.
- Cleaned and transformed 50k+ records using Excel and Python, improving reporting accuracy and dashboard performance.
- Wrote optimized SQL queries to extract and structure data for analysis.

OJSIT Solution Limited – Data Analyst (Intern) Auchi, Nigeria

Apr. 2025 – Aug. 2025

- Cleaned and validated datasets using advanced Excel functions to improve accuracy and reliability.
- Designed and maintained databases, supporting daily workflows and routine data operations.
- Conducted exploratory data analysis with Python (Pandas, NumPy) to identify insights and patterns.
- Visualized key metrics using Matplotlib and Seaborn, presenting results in clear, actionable formats.

PROJECTS

Sales & Profit Performance Dashboard – Tableau

- Designed and developed an interactive Tableau dashboard integrating customer, category, sales team, region, and sales order data.
- Visualized sales and profit trends using dynamic filters to track KPIs, performance metrics and support decision-making.

E-commerce Dataset Analysis – Excel & Python

- Cleaned and structured raw e-commerce data for accurate reporting.
- Developed Excel dashboards with KPIs for monthly sales and customer retention.
- Applied advanced Excel functions (PivotTables, charts, formulas) to uncover trends and patterns.

EDUCATION

Auchi, Polytechnic, Auchi, Nigeria – Higher National Diploma (HND) **2019**

Polymer engineering Technology

Akpekpe Secondary School, Auchi, Nigeria **2013**

Senior Secondary Certificate Examination (SSCE)

CERTIFICATIONS

- NYSC Certificate.
- Project Management Certificate – University of Ibadan.

ACHIEVEMENTS

- Delivered a flagship project on customer segmentation using Python and Tableau, generating actionable insights.
- Recognized for outstanding teamwork and analytical contributions at OJSIT Solution Limited, improving reporting accuracy.
